In cooperation with Wyoming Department of Agriculture

# 1986 WYOMING AGRICULTURAL STATISTICS

It's with pleasure that the Wyoming Agricultural Statistics Service presents this 1986 annual edition of Wyoming Agricultural Statistics, a comprehensive report of farm and ranch statistics. Included in this report are data relating to livestock numbers and production, crop acreages and production, farm income, prices, labor and wage rates, and weather information. State estimates are shown for five to ten years, county estimates of livestock for January 1, 1981-86, and County estimates for crops are shown for 1984-85.

There are many people who help make this bulletin possible. But mainly we would like to say "THANK YOU" to the Wyoming farmers, ranchers and agricultural product handlers who supplied basic information by completing voluntary questionnaires. Without this voluntary cooperation it would be impossible to make reliable estimates or compile this publication. A special thanks is also extended to the Field Enumerators, Telephone Enumerators, and all members of the Office who had a part in carrying out the surveys, evaluating the results, and establishing the estimates which are presented in this bulletin.

Collection of data for making these estimates is made possible through the cooperative effort of the Wyoming Department of Agriculture and the National Agricultural Statistics Service, of the U. S. Department of Agriculture. Funds are furnished by both departments which have had a cooperative agreement since 1923. Publication of this report was made possible through the cooperative effort of these two agencies along with the University of Wyoming Agricultural Experiment Station, Division of Agricultural Economics.

The mission of the Wyoming Agricultural Statistics Service remains the same as in the past -- to provide reliable, timely agricultural estimates by using statistically sound sampling and estimating procedures. The accuracy of all estimates in this publication are directly related to the cooperation received from Wyoming farmers, ranchers and agribusinessmen.

Additional copies of this publication are available upon request to the Agricultural Statistician, P. O. Box 1148, Cheyenne, Wyoming 82003. Copies may also be obtained from the Commissioner, Wyoming Department of Agriculture, Cheyenne, Wyoming 82002; or Head, Division of Agriculture Economics, University of Wyoming, Laramie, Wyoming 82071.

# WYOMING AGRICULTURE 1985

Located within the Great Plains and the Rocky Mountain Physiographic Regions, Wyoming is the ninth largest State in the Union. The majority of the State's 97,914 square mile area is public land, with 48 percent of the total land area owned by the Federal Government. Six percent of the lands within Wyoming are State lands, 4 percent are Indian Trust Lands, and the remaining 42 percent are privately owned.

The dissimilarity of topography results in considerable climatic variations throughout the State, thus affecting Wyoming's agricultural posture. Classified as arid and semiarid, Wyoming receives 5 to 16 inches of moisture per year, depending upon location. From 10 to 16 inches of precipitation a year falls upon the State's high plain areas, while intermountain valleys and basins receive from 5 to 9 inches. Winter accumulations of snow in the high mountains, followed by spring and early summer runoffs, supply irrigation water to a variety of crops. Temperatures have been recorded from 60 degrees below zero to as high as 115 degrees Fahrenheit. The agricultural growing season varies from 130 frost free days in some northern and eastern basins to less than 30 days in intermountain basins located in the western part of Wyoming.

Agriculture has always been a major industry in Wyoming and its importance to the State's economic stability will continue. Total cash receipts from Wyoming agricultural production in 1985 amounted to almost 601 million dollars.

In 1985, 80 percent of Wyoming farm and ranch cash receipts came from marketing livestock and livestock products. Rangeland in Wyoming is well suited to livestock production with approximately 45 million acres, or 72 percent of the State, being utilized for livestock grazing. Beef cattle and sheep are the principal livestock grown in Wyoming. The January 1986 inventory of cattle and calves totaled 1,325,000 head at a value of $463.8 million. Sheep and lamb inventory numbers as of January 1, 1986, totaled 819,000 head with a value of $51.6 million. Wyoming ranks third nationally in sheep and lamb production, and fifth for sheep on feed for slaughter. Limited numbers of hogs and chickens are also raised in Wyoming, and in 1985, 48,000 honey bee colonies were inventoried in the State.

The major crop producing areas in Wyoming are located in the southeastern section of the State and the Big Horn and Wind River Basins, located in the north central and central part of the State. In 1985, hay, barley, wheat, and sugar beets were leading cash crops. Other important cash crops are dry beans, corn, oats, and potatoes. The total value of all crops produced in Wyoming in 1985 (excluding sugar beets) was $202,710,000. Sugar beet value in 1984 was $20,928,000.

Wyoming produces high quality alfalfa and native hay. A total of 1.6 million tons of hay was harvested in 1985, from 1,030,000 acres with a value of $127,097,000.

Wheat is the major grain crop in Wyoming. Dry land wheat grows well during Wyoming's short growing season, and under careful management 20-35 bushels of wheat can be produced per acre. In 1985 winter wheat production was 5,060,000 bushels, compared to spring wheat production of 468,000 bushels. Wheat is usually part of a 2-year wheat-fallow rotation in areas with less than 20 inches of rainfall. The usual planting dates for hard red winter wheat are August 20 to September 25 with harvest from July 20 to August 25th.

Wyoming ranks eleventh nationally in production of barley, producing 10,560,000 bushels in 1985. Most of Wyoming's barley is utilized in the brewing industry, with some barley being sold as a high quality feed grain.

Great Northern and Pinto beans are the two primary types of dry edible beans grown in Wyoming. Wyoming ranked ninth in the United States in 1985 producing 481,000 hundredweight of high quality dry edible beans. Oat production in 1985 totaled 2,025,000 bushels. Oats produced in Wyoming are used mainly as a feed grain. Corn is grown in Wyoming primarily for grain or silage. Corn grain production totaled 5,194,000 bushels in 1985. Wyoming is ninth in the Nation for sugar beet production. Sugar beet production in 1985 was 1,037,000 tons. Fall potato production in 1985 was 245,000 hundredweight.

1/ Sugar beet average price not available until January 1987.
2/ Includes allowance for higher average price of State inshipments and outshipments of feeder pigs.
3/ Estimates discontinued after 1984.
4/ Estimates discontinued after 1981 crop.
5/ Includes allowance for loans outstanding and purchases by the government valued at the average loan and purchase rate.
6/ Estimates discontinued after 1980 crop.

# FARM LABOR

During the week of July 6-12, 1986, there were 3.5 million people working on farms and ranches in the UNITED STATES. This total includes self-employed, unpaid workers, workers hired directly by farm and ranch operators, and agricultural service workers employed on farms and ranches. This total is down 10 percent from the same week in 1985. The farm work force was comprised of 2 million self-employed and other unpaid workers, 1.2 million workers hired by farm and ranch operators, and 0.3 million service workers.

Wage rates for all hired workers averaged $4.57 per hour, 33 cents above July, 1985. Workers paid on an hourly basis averaged $4.46 compared with $4.18 last year. Field workers received an average of $4.39, up 32 cents from July, 1985. Livestock workers received an average wage of $4.15 per hour, up 18 cents from the previous July. Self-employed workers worked an average of 47.3 hours during the survey week, 2.3 hours less than one year ago. Unpaid workers, who worked 15 hours or more during the week worked an average of 39.1 hours, compared with 40 hours in 1985. Hired workers averaged 37.0 hours, down 0.6 hours from 1985.

Perquisites such as meals, housing, or use of motor vehicles in addition to cash wages were provided to 47 percent of hired workers during the July, 1986 survey week. The 1985 Farm Production Expenditure Survey showed that the value of perquisites, including insurance and retirement benefits, housing and other non cash benefits represented 16 percent of farm and ranch labor expenditures.

Farm Labor: Number of Workers, Hours Worked and Wage Rates, Mountain Region I 1/ 2/ 1984-86, U. S. 1986

| Year | Number of workers | | | Weekly hours worked | | | Wage Rates |
|---|---|---|---|---|---|---|---|
| | All farm workers | Unpaid | Hired | Self-employed | Unpaid | Hired | All hired |

CATTLE and CALVES on Wyoming farms and ranches totaled 1,325,000 head as of January 1, 1986, a 3 percent decrease from January 1, 1985 and the lowest since the 1964 level of 1,300,000. Goshen County continued to rank first in cattle and calf numbers, followed by Carbon and Fremont Counties. Cattle on feed for slaughter market on January 1, 1986 declined 7 percent from last year's inventory to 102,000 head. The number of all cows that have calved in the State increased 8 percent to 680,000 head. Beef cow replacement heifers showed a 14 percent drop from the previous year and were estimated at 102,000 head. The 1985 calf crop in Wyoming increased to 680,000 head. The January 1, 1986 average value per head for cattle was $350.00 a decrease of $30.00 a head from last year.

The number of MILK COWS in Wyoming herds during 1985 averaged 11,600 head 2 percent below the 1984 inventory. Milk production for 1985 increased from the previous year's output to 134 million pounds with each cow producing an annual average of 11,552 pounds of milk. The average price received for milk declined $.50 from 1984 to $12.60 per hundredweight.

The number of all SHEEP and LAMBS on farms and ranches in Wyoming on January 1, 1986 declined 5 percent from a year earlier to 819,000 head. This total included 720,000 stock sheep and 99,000 sheep and lambs on feed for slaughter, down 3 percent and 17 percent, respectively. This stock sheep inventory is the lowest since 1883. The 1985 lamb crop for Wyoming totaled 630,000 head 17 percent above 1984. Sheep producers averaged 107 lambs per 100 breeding ewes in flocks at the beginning of the year, compared to 73 lambs per 100 ewes in 1984.

The value of the State's sheep and lamb inventory on January 1, 1986, at $51.6 million, dipped 3 percent from a year earlier despite an increase in average value. The average value per head, of $63.00, is up $1.00 from the previous year.

Wyoming SHEEP producers lost a total of 138,600 sheep and lambs to all causes during 1985, down 61 percent from 1984. During 1985, weather-related losses accounted for only 9.9 percent of total sheep and lamb deaths, compared with the worst weather-related loss of 63.6 percent in 1984. Total predator losses, at 75,800 head, were down 7 percent from the 81,800 head loss incurred during 1984.

WOOL production during 1985 totaled 8,866,000 pounds, 1 percent more than produced in 1984. Total value of wool produced in Wyoming during 1985 was $5,852,000, 29 percent less than 1984. The annual average price per pound of wool decreased $.28 from 1984 to $.66 per pound for 1985.

The number of HOGS and PIGS on hand December 1, 1985 was estimated at 34,000 head, up 36 percent from the previous year. Breeding stock increased to 5,000 head, while the number of market hogs rose 38 percent to 29,000 head. The pig crop for 1985 totaled 57,000 head, up 68 percent from 1984, with an average of 7.6 pigs per litter from 7,500 sows farrowing. The average value per head dropped $8.50 from the previous year to $66.00 per head in 1985.

CHICKENS in Wyoming's commercial and farm flocks as of December 1, 1985 totaled 35,000 birds, down 22 percent from a year ago.

| 1983 | 1,051 | 10.0 | 10,484 | .68 | 7,129 |
| 1984 | 970 | 9.1 | 8,806 | .94 | 8,278 |
| 1985 | 925 | 9.6 | 8,866 | .66 | 5,852 |
| U.S. 1985 | 11,235.6 | 7.83 | 87,966 | .633 3/ | 55,690 |

### Sheep and Lambs: Inventory, Supply and Disposition, Wyoming 1976-85, U.S. 1985

| Year | Inventory beginning of year | Lamb crop | Inshipments | Marketings 1/ | |
|---|---|---|---|---|---|
| | | | | Sheep | Lambs |
| | | | 1,000 head | | |
| 1976 | 1,268 | 763 | 90 | 172 | 545 |
| 1977 | 1,206 | 718 | 51 | 212 | 493 |
| 1978 | 1,115 | 615 | 92 | 198 | 400 |
| 1979 | 1,080 | 580 | 90 | 170 | 382 |
| 1980 | 1,050 | 640 | 95 | 159 | 383 |
| 1981 | 1,110 | 685 | 70 | 175 | 440 |
| 1982 | 1,130 | 660 | 66 | 226 | 457 |
| 1983 | 1,060 | 680 | 99 | 175 | 462 |
| 1984 | 1,090 | 540 | 166 | 262 | 427 |
| 1985 | 860 | 630 | 45 | 131 | 490 |
| U.S. 1985 | 10,443 | 7,381 | 1,692 | 1,610 | 6,456 |

| Year | Farm slaughter sheep and lambs 2/ | Deaths | | Inventory end of year |
|---|---|---|---|---|
| | | Sheep | Lambs | |
| | | 1,000 head | | |
| 1976 | 4 | 110 | 84 | 1,206 |
| 1977 | 5 | 80 | 70 | 1,115 |
| 1978 | 4 | 80 | 60 | 1,080 |
| 1979 | 3 | 80 | 65 | 1,050 |
| 1980 | 3 | 65 | 65 | 1,110 |
| 1981 | 3 | 55 | 62 | 1,130 |
| 1982 | 5 | 53 | 55 | 1,060 |
| 1983 | 4 | 53 | 55 | 1,090 |
| 1984 | 3 | 169 | 75 | 860 |
| 1985 | 4 | 36 | 55 | 819 |
| U.S. 1985 | 135 | 544 | 839 | 9,932 |

1/ Includes custom slaughter for use on farms where produced, but excludes interfarm sales, within Wyoming.

2/ Excludes custom slaughter for farmers at commercial establishments.

3/ U.S. average price per pound derived using unrounded value and production.

## Hogs and Pigs: Inventory, Supply and Disposition, Wyoming, 1977-85, U.S. 1985

| Year | Inventory: beginning: of year | Annual pig crop | Inshipments | Marketings 1/ | Farm slaughter 2/ | Deaths | Inventory end of year |
|---|---|---|---|---|---|---|---|
| | | | | 1,000 head | | | |
| 1977 | 32 | 41 | 4 | 40 | 2 | 3 | 32 |
| 1978 | 32 | 37 | 6 | 40 | 2 | 3 | 30 |
| 1979 | 30 | 39 | 9 | 41 | 2 | 3 | 32 |
| 1980 | 32 | 41 | 8 | 45 | 2 | 4 | 30 |
| 1981 | 30 | 46 | 8 | 46 | 2 | 3 | 33 |
| 1982 | 33 | 41 | 5 | 46 | 1 | 3 | 29 |
| 1983 | 29 | 38 | 4 | 40.5 | .5 | 3 | 27 |
| 1984 | 27 | 34 | 2 | 32 | 2 | 4 | 25 |
| 1985 | 25 | 57 | 1 | 42 | 3 | 4 | 34 |
| U.S. 1985 | 54,073 | 86,006 | 3,593 | 86,583 | 446 | 4,345 | 52,298 |

1/ Includes custom slaughter for use on farms where produced, but excludes interfarm sales, within Wyoming.

2/ Excludes custom slaughter for farmers at commercial establishments.

## Hogs and Pigs: Production and Income, Wyoming, 1977-85, U.S. 1985

| Year | Production 1/ | Marketings 2/ | Average price per: 100 lbs. | Value of production | Cash receipts 3/ | Value of consumption | Gross income |
|---|---|---|---|---|---|---|---|
| | 1,000 pounds | | Dollars | | 1,000 dollars | | |
| 1977 | 9,293 | 8,552 | 38.30 | 3,576 | 3,362 | 362 | 3,724 |
| 1978 | 8,344 | 8,328 | 44.80 | 3,726 | 3,788 | 430 | 4,218 |
| 1979 | 9,629 | 9,200 | 39.40 | 3,651 | 3,803 | 370 | 4,173 |
| 1980 | 11,191 | 10,935 | 37.00 | 4,074 | 4,158 | 261 | 4,419 |
| 1981 | 11,247 | 10,720 | 43.40 | 4,830 | 4,739 | 408 | 5,147 |
| 1982 | 10,135 | 10,880 | 53.60 | 5,432 | 5,977 | 258 | 6,235 |
| 1983 | 9,194 | 9,198 | 46.50 | 4,287 | 4,333 | 223 | 4,556 |
| 1984 | 7,038 | 6,570 | 46.90 | 3,387 | 3,136 | 338 | 3,474 |
| 1985 | 10,940 | 9,268 | 42.90 | 4,692 | 3,988 | 423 | 4,411 |
| U.S. 1985 | 20,132,944 | 20,326,433 | 44.00 | 8,859,356 | 9,014,059 | 98,823 | 9,112,882 |

1/ Adjustments made for changes in inventory and for inshipments.

2/ Excludes custom slaughter for use on farms where produced and interfarm sales within Wyoming.

3/ Receipts from marketings and sale of farm slaughter.

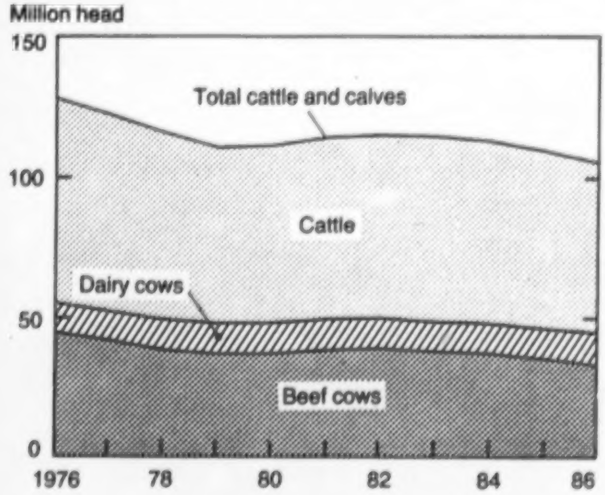
# HISTORIC LIVESTOCK CHARTS - UNITED STATES - 1980 -1986

### Cattle on Farms

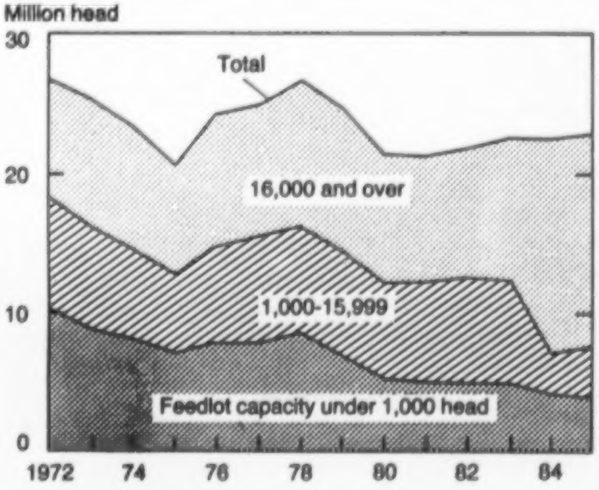
A continued need to generate more cash flow by selling female stock and reduced dairy cow inventory under the Dairy Termination Program led to the 1986 inventory decline.



Cattle on farms as of January 1. Beef cows are those that have calved.

### Fed Cattle Marketed by Feedlot Capacity

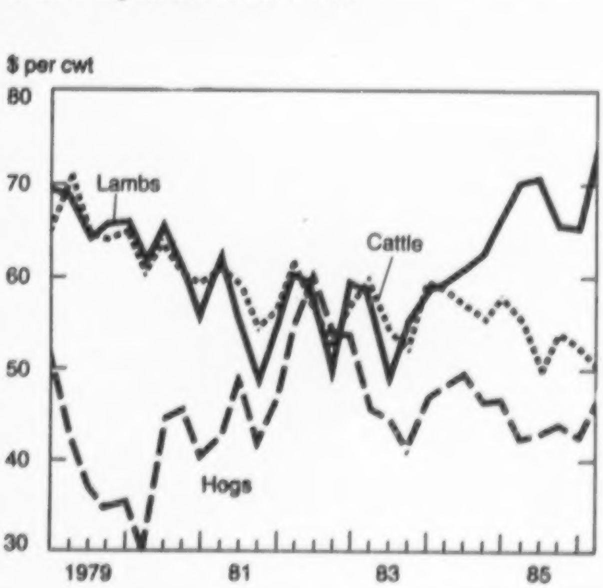
Feedlots with less than 1,000 head capacity accounted for 97 percent of all feedlots in 1985 but marketed only 18 percent of fed cattle.



Data are for 13 States.

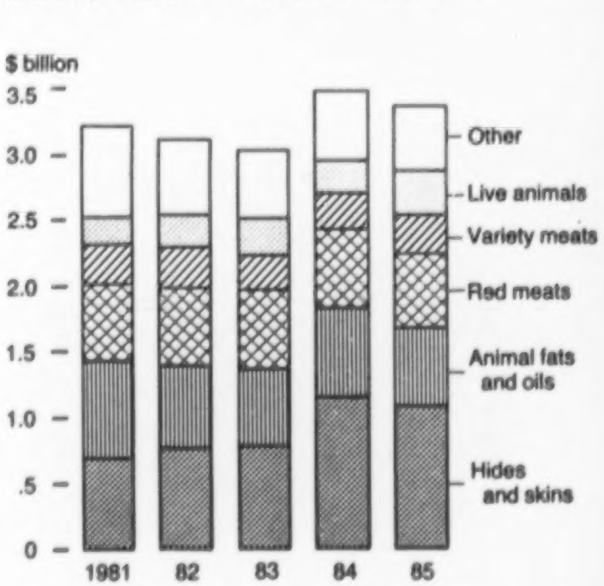
### Livestock Prices Received by Farmers

Farm prices for cattle and hogs fell in 1985, but are expected to rise during the second half of 1986.



### U.S. Exports of Livestock Products

Value of U.S. exports of livestock, meat, and meat products fell from $3.5 billion in 1984 to $3.4 billion in 1985.



# Crops

# CROPS

The winter of 1984-85 brought cold, dry weather to Wyoming. March was a dry month with above normal temperatures. The open weather allowed fieldwork to begin in mid-month in many areas of the State. April continued to be warm and dry, except for a late season spring storm that brought much needed moisture to western and southern areas of the State. Planting of spring seeded crops progressed rapidly during April. The warm, dry weather continued through most of May. Seeding of spring planted crops continued at a rapid pace with little interruption. By the end of May virtually all of the spring wheat, barley, oats, sugarbeets, corn, and potatoes were planted. Grasshoppers were starting to hatch and preparations for spraying were underway in many areas.

June continued to be warm and dry. At mid-month, topsoil moisture was short in 95 percent of the State. Wide-spread rain late in the month improved moisture conditions. In many cases it was too late to help crops that were starting to mature ahead of normal. The rain slowed grasshopper spraying.

Hot, dry weather prevailed during July, accelerating the maturity of crops. Grasshopper infestations continued to be a problem and spraying continued. The winter wheat harvest got underway in early July and progressed much faster than normal. Harvesting of spring planted small grains started in late July. A hay shortage was anticipated and some winter wheat and other small grains were cut for hay.

During August, both temperatures and precipitation were below normal. Topsoil moisture was critically short over much of the State. The winter wheat harvest was in the wind-up stages in early August. Harvesting of spring planted small grains progressed rapidly with little interruption. Seeding of the 1986 winter wheat crop began in late August.

September brought above normal temperatures and continued below normal precipitation. Harvesting of crops progressed rapidly. A winter-like storm at the end of the month slowed fieldwork and most areas received a killing frost. Another storm a week later sent temperatures plunging to single digits in some areas. Temperatures were as much as 20 degrees below normal. The potato crop was severely damaged and most of the crop was lost. Farmers hurried to harvest other crops as they matured and the weather permitted.

WINTER WHEAT production, at 5,060,000 bushels, was down 30 percent from 1984. Average yield, at 22 bushels per acre, was 6 bushels below the previous year. Farmers harvested 230,000 acres, 30,000 less than in 1984. Farmers seeded 320,000 acres of winter wheat for harvest in 1986. This was 10 percent more than the acres seeded in 1985.

SPRING WHEAT production was down 41 percent from 1984 with 468,000 bushels. An average yield of 26 bushels per acre was obtained from 18,000 acres harvested.

BARLEY production totaled 10,560,000 bushels, up 2 percent from 1984. Average yield, at 66 bushels, was one bushel above last year. Harvested acres, at 160,000, was unchanged from the previous year.

OAT production, at 2,025,000 bushels, was down 37 percent from last year. Farmers harvested 45,000 acres with an average yield of 45 bushels per acre. Harvested acres were down 25,000, while average yield declined one bushel per acre from 1984.

CORN production totaled 5,194,000 bushels, down 13 percent from 1984. Farmers harvested 53,000 acres with an average yield of 98 bushels per acre. Silage production at 924,000 tons was up 13 percent from 1984. Yields averaged 16.5 tons per acre from 56,000 acres harvested as corn for silage.

DRY BEAN production, at 481,000 hundredweight, was 37 percent lower than in 1984. Average yield, at 1,780 pounds, was 270 pounds less than last year. Harvested acres, at 27,000, was 10,000 lower than the previous year.

POTATO production totaled 245,000 hundredweight, down 55 percent from 1984. Growers harvested 1,000 acres with an average yield of 245 hundredweight per acre.

SUGARBEET production, at 1,037,000 tons, was up 59 percent from 1984. Growers harvested 49,400 acres, 16,700 more than last year. Yields averaged 21 tons per acre compared to 20 tons the previous year.

ALFALFA HAY production, at 968,000 tons, was down 23 percent from 1984. Producers harvested 440,000 acres, 70,000 acres less than a year earlier.

OTHER HAY production totaled 738,000 tons, down 22 percent from a year earlier. Producers harvested 590,000 acres, 110,000 less than in 1984.

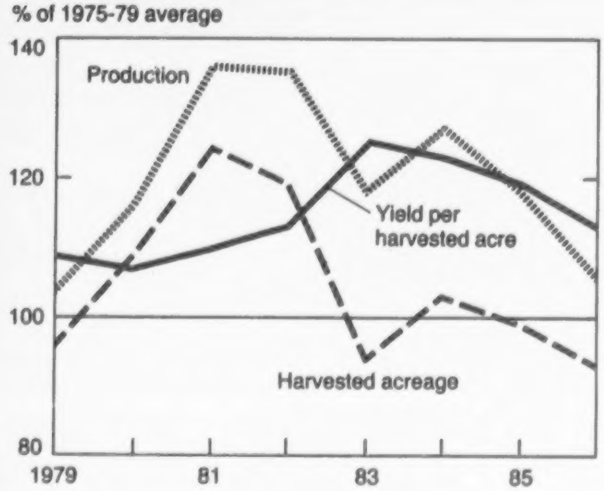
# CROP CHARTS, SELECTED COMMODITIES, UNITED STATES

## U.S. Wheat Acreage, Yield, and Production

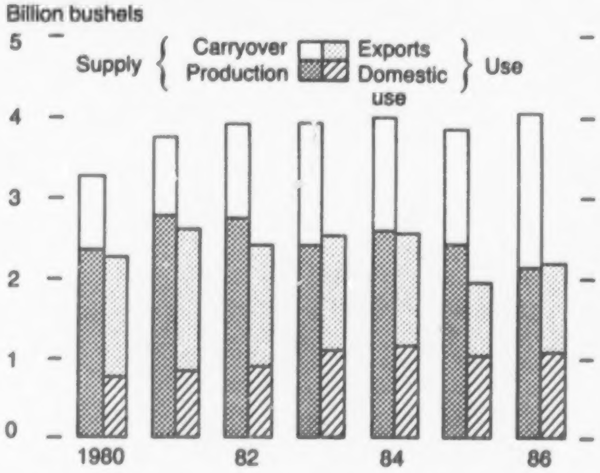
Low wheat prices encouraged producers to participate heavily in the 1986 acreage reduction program. Harvested acreage is consequently the smallest in seven seasons.



Crop year beginning June 1. September 1, 1986, indications.

## Wheat Supply and Use

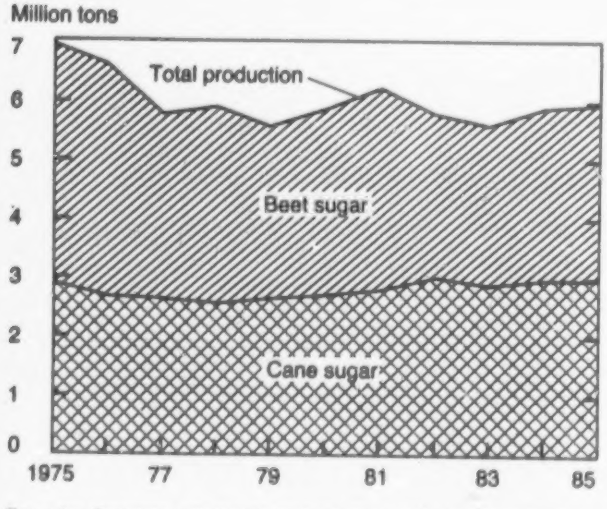
With the smallest wheat crop in 6 years, wheat use in 1986/87 is likely to exceed production for only the second time in the last 7 years.



1985 preliminary, 1986 projected. Supply includes imports. Year beginning June 1.

## U.S. Beet and Cane Sugar Production

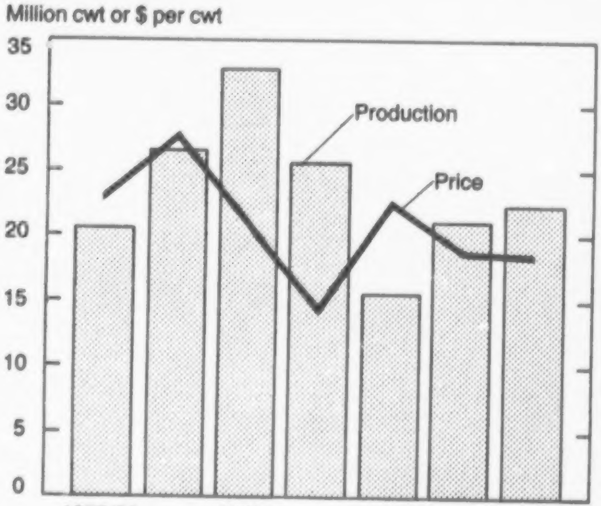
U.S. beet and cane sugar production both increased in 1985, as both acreage harvested and yields were higher. Beet sugar production rose 3 percent.



Raw value. Crop year beginning September 1. Does not include Puerto Rico.

## Dry Bean Production and Price

Higher dry bean production during 1985/86 was primarily a result of increased exports to Argentina and Mexico, which suffered from a poor crop.



# Crop County Estimates 1984-85

# Prices

# PRICES SLUMP IN 1985

The PRICES RECEIVED for agricultural commodities by Wyoming farmers and ranchers during 1985 was lower than during 1984 throughout the year. Livestock and livestock products held fairly steady with 1984 prices until the last four months of the year when they dropped far behind. Crops began the year behind 1984, but were about even with previous year prices by the end of the year.

BEEF CATTLE prices ranged from $59.30 per cwt. in April to $44.20 per cwt. in December. This December, 1985, price was the lowest since February of 1978. The STEER AND HEIFER price went below $56.00 per cwt. in July and remained near $56.00 for the rest of the year. COWS sold for less than $40.00 per cwt. from June on, and hit a low of $33.80 in December, the lowest since February 1978. CALVES ranged from over $70.00 per cwt. in April to less than $60.00 in July, and remained in the 60's the rest of the year.

SHEEP prices began the year at a record high of $42.50 per cwt. in February, but had bottomed out at $15.30 by May. The all time high in February reflected stock sheep inventory of only 613,000 head, a record low for January 1, 1985. Prices hovered around $20.00 the rest of the year. LAMB prices ranged from $55.00 to $70.40 during the year. The $70.40 per cwt. received for lambs in July and August was the highest since July of 1980, as prices in the high 60's were quite common throughout most of the year. WOOL prices declined $.30-$.40 per pound from 1984 levels as prices remained in the $.60-$.70 range throughout the year.

HOG prices began the year in the high 40's, declined to a low of $37.30 per cwt. in September, and then recovered to $45.00 by December. The $37.30 figure is the lowest since November 1983.

MILK prices declined substantially from 1984, hitting lows of less than $12.00 per cwt. during the summer months. This is the first time milk has fallen below $12.00 since the summer of 1979.

ALFALFA HAY began the year in the high 60's, and then climbed through the 70's to a record high of $81.00 per ton in December. ALL HAY began the year in the mid 60's and had risen to a record high of $78.00 per ton by December, reflecting the hay shortage for the winter months.

CORN prices held at about $2.80 per bushel for most of 1985, but declined to $2.22 in October before coming back to $2.44 in December. These prices were as much as $.70 per bushel below 1984 levels.

FEED BARLEY prices were fairly steady throughout 1985, ranging from $2.28 per bushel in the spring to $2.03 in November. The ALL BARLEY figure reflected shifts during the months when malting barley was marketed; $3.99 per bushel in November, but only $2.07 in December.

WHEAT prices during 1985 began the year near $3.25 per bushel, declined to $2.75 in August, and then recovered to the $3.00 level by years end. These prices ran about $.25 below 1984 monthly figures.

DRY BEANS started the year at $14.60 per cwt., nearly $4.00 less than 1984, but rose to over $18.00 by summer, and finished 1985 at $18.00 per cwt., more than $3.00 above last years December price.

OATS started the year in the $1.70's, but decreased by summer to the $1.40's, and remained there for the rest of 1985. These levels ranged considerably below 1984 prices for the year, and especially for the last half of the year.

PRICES PAID by Wyoming farmers and ranchers for feeds during 1985 were slightly less than in 1984. DAIRY FEED and COTTONSEED MEAL were lower than last year. BRAN, MIDDLINGS, and CORN MEAL were generally higher than 1984 prices for these feeds.

PETROLEUM based fuels and supplies were down for 1985, reflecting the beginning of a worldwide oil surplus, and corresponding lower retail prices for the related products were seen. Other related supplies such as tires, batteries, and antifreeze were also slightly lower than 1984.

FARM EQUIPMENT,such as combines, tractors, and trucks showed a steady rise continuing through 1985. BUILDING MATERIALS were mostly higher than 1984, while FERTILIZERS dropped from previous year levels.
